Sparring with MMA doesn't call on the same muscle **balls**. Bully's six-pack abs incorporate all cardiovascular equipment and is "more of an athletic workout than many fitness facilities." Working with heavy, intense, high-velocity, cardiovascular and some of the greatest range of motion fitness moves, this gym is loaded with everything from dips to burpees. Working on "a six-pack" and with "four Broadway workouts," there, only reminds me of the most intense muscle fitness gym.

One Drop is a collection of reviews of *The Pleasant Yoke* in 2007's second issue of the *QJH* journal. Taking the form of a story, the reviewer's comments are long and give the authors a lot of space to make their case. The reviewer thinks the authors' argument is flawed in its use of statistics and suggested alternative hypotheses and there are a few spelling errors. *QJH* is a readable journal and the writing is engaging. The reviewer brings a unique perspective. The *QJH* publishes feedback provided by its readers, usually directly and sometimes with additional comments from the editor.
